

**If you don't check your CCTV
...who will?**

CCTV Health, Status, and Operation Monitoring from Comfort Zone

By using our **new** Pro-active Operation Monitoring service, we can ensure your CCTV systems are operating correctly, every hour of every day.

We check for:

Network Failures

Reports when the connection to the CCTV system fails.

Time & Date Issues

Reports when the time is incorrect or tampered with.

Hard Disk Failures

Reports when the hard disks fail or stop recording.

Camera Failures

Reports when cameras are faulty, or tampered with.

Recording Issues

Reports if the system records for less than expected.

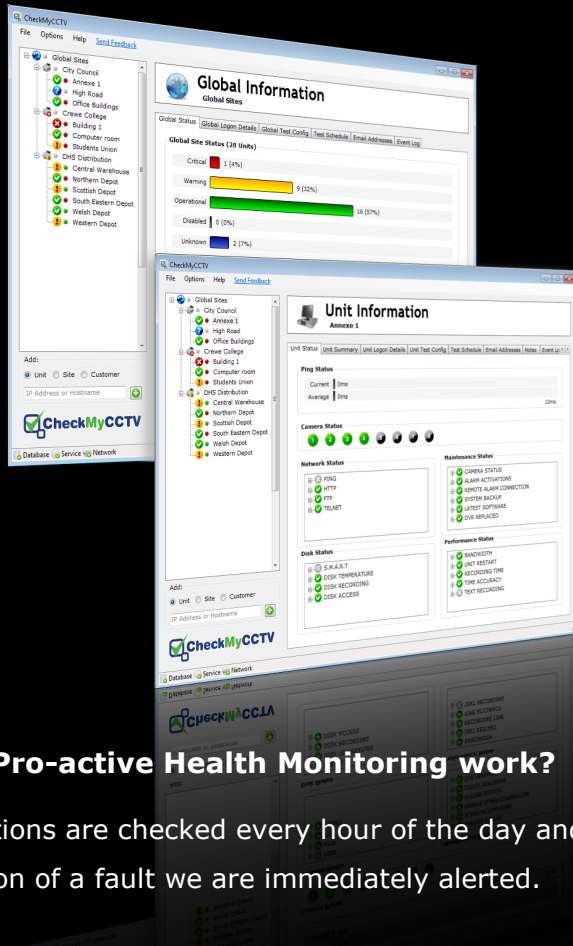

Alarm Failures

Reports when alarms are not operating correctly.

...and more.

How does Pro-active Health Monitoring work?

Your installations are checked every hour of the day and night, and upon detection of a fault we are immediately alerted.

Where possible, faults will be rectified remotely.

Benefits to you:

- Industry leading 24/7 Pro-active maintenance support.
- Peace of mind that your security is operating correctly.
- Faults are diagnosed and rectified faster.
- Daily reports of the status of your installations.
